

CAL POLY POMONA STEEL BRIDGE

2020-2021 SPONSORSHIP PACKAGES

WHO WE ARE

The Cal Poly Pomona Steel Bridge Competition Team consists of undergraduate engineering students that work together to plan, design, fabricate, and construct a one-tenth scale model steel bridge. Every Spring, the final product is brought along to compete nationally at the Student Steel Bridge Competition hosted by the American Institute of Steel Corporation (AISC). This project incorporates technical knowledge with hands-on experience, remaining consistent with Cal Poly Pomona's "Learn by Doing" philosophy.

Funding received from sponsors help support costs associated with the design, fabrication, and construction of our student-made steel bridge. To learn more, please visit <https://www.cppsteelbridge.com/about>.
